Hot-dip-galvanizing

Service

- Express-Service
- Consulting in the construction phase to ensure the material will be suitable for hot-dip-galvanizing
- Corrosion protection consulting
- Packing

Receipt/Delivery of goods  
Saturday – Thursday (24 hours),  
Friday subject to agreement

## THINK GREEN. HOT-DIP-GALVANIZE SUSTAINABLY.

And, at the same time, always have an eye on efficiency. That is the philosophy of the ZINKPOWER® Group. Therefore, all of our hot-dip-galvanizing plants are state-of-the-art. This way, we can develop customised and flexible solutions for your requirements at every location and guarantee the highest quality and absolute adherence to delivery dates.

We always think about our environment and set high environmental standards. Therefore, the production is free from waste water and specialised filtering systems, developed by our own engineering division, are used for purifying the air. Furthermore, investments are always examined with respect to their environmental compatibility.

The result: virtually all companies in the ZINKPOWER® Group are certified according to DIN EN ISO 14001. Reason enough that hot-dip-galvanizing is now called green-dip-galvanizing with us — in Sharjah as well as in all our other plants!

**Hot-dip-galvanizing in the ZINKPOWER® Group is sustainable, guarantees the highest quality and is extremely economical – a method that pays off!**

Tested for conformity with  
the ZINKPOWER® Group  
environmental standards

**ALSO IN THE MIDDLE EAST  
AT OUR CUSTOMERS' SIDE.**

Wherever the customers need us, the ZINKPOWER® Group is there. Therefore, we hot-dip-galvanize at 36 locations in Europe, America, Asia – and since 2008 also in the United Arab Emirates. As at all our locations we guarantee the highest quality. The location is certified according to DIN EN ISO 9001, right from the start. We guarantee this top quality for numerous products to be hot-dip-galvanized: from individual components over complicated steel structures to serial products.

**THE RESULTS SPEAK FOR THEMSELVES.**
